ACT OF A HERO.

Instantly Killed While Trying to Save

the Life of a Little Girl. PHILADELPHIA, Aug. 17. - Thomas Hovenden, the famous American artist, was killed Wednesday while heroically trying to save the life of a little girl. He had his summer residence in Plymouth township, Montgomery county, which is reached by a line of trolley cars. At the tracks of the Trenton cut-off of the Pennsylvania railroad trolley passengers are compelled to leave the cars on one side, cross the tracks and take the cars again on the other side. When Mr. Hovenden was going home in the afternoon there were, besides mself, on the trolley car Mrs. Carrie Pfeifer and her 10-year-old daughter. Just as the passengers alighted to cross the railroad a fast freight was approaching. The little girl, not noticing the proaching train, ran ahead of her other and was in the middle of the track before she saw her danger. She en stood as if paralyzed. Mr. Hovenden jumped forward and grasped the child in his arms, but before he could get out of the way he was struck by the pilot of the engine and instantly killed. The child died a few minutes later.

That Fact Makes the Volume In August Appear Very Small by Comparison. All Iron Products In Good Demand at Better Prices-Exports of Wheat Are Slowly Increasing.

NEW YORK, Aug. 17.-R. G. Dun & Co., in their review of trade today, say: It is a belated season; May set every thing back. The heavy business which ought to have been done in May and June was pushed in July, so that the midsummer decline due in July comes in August. With this in mind, one is not surprised to find the shrinkage from July to August rather more conspicuous than usual. The disappointing crop reports of last Saturday, though evidently Parliamentary Committee Formed to distrusted, lessen confidence in regard to the future of trade even while some speculators gain by them.

RACES AT THE CAPITAL CITY.

Large Crowd In Attendance and the Races First-Class-Attempted Murder and Suicide-End of the Bethany Assembly Meetings - Fatal Duel With Knives at Stineville-State Notes.

Indianapolis, Aug. 17. — Yesterday was the big day at the races, and the best crowd of the week was in attendance. The heat was simply awful, the thermometer at 2 p. m. registering 98 in the signal service's cold storage vault, while on the street most all instruments honestly put it above 100. But 4,000 people braved the heat, and were well rewarded by seeing the best race of the week. Fidol was the favorite in the 2:09 pace, and he had no trouble in winning, although in the second heat, Coastman, who had a bad start, being back several lengths when the word was given, pushed through the field and came in a close second, really making the mile in less time than the winner. But had there been any necessity for it. Fidol could have apparently cut off a couple of seconds, as he won easily in terday as follows: Ijamsvilie, Wabash straight heats, Coastman second, Cole-county, G. W. Frederick, vice Florin straight heats, Coastman second, Coleridge third. Atlantic King fourth; time 2:08¹/₄, 2:05¹/₄, 2:05¹/₄. The 2:45 pace for 2-year-olds was won by Ananias, May Queen and Asa S were tied for the place; time 2:33½, 2:13½. In the 2:16 trot Baron Wilkes took the first, third and fourth heats and the race. Roxane won the second heat, Ben B. third. and swindler, was among them. Maud C. fourth; time 2:1314, 2:1234, 2:1214, 2:1214.

The tragedy resulting in the death of John M. Wehrle, clerk of Clay county, which occurred a month ago, in which Mr. Wehrle Bank, cash \$2. met his death at the hands of Hon. George A. Knight, a prominent attorney, was climaxed today by a statement issued by the father-in- Hamilton, grocer, mdse, \$1.00. law, widow, two brothers and brother-in-law of the deceased, wholly exonerating Mr. Knight from all blame. Mr. Wehrle and ladies and gents furnishings, mdse, \$1.00. Mr. Knight were neighbors, and one night the latter was awakened by noise he believed to have been occasioned by burglars. He heard some one run down stairs and out the door. Mr. Knight seized a pistol and followed quickly. Hearing some one slam the gate and seeing a man pass along the sidewalk, believing it to be the person who invaded his house, Mr. Knight fired, killing Mr. Wehrle, who happened to be passing at this inopportune moment. Mr. Wehrle was returnfrom down town where he posted a letter. The tragedy was universally deplored as both men were very prominent and bosom friends. The statement given to the press

today reads as follows: TO THE PUBLIC: We make this voluntary communica tion in the interest of a correct public statement, and in vindication of simple truth and justice. While every one oncerned laments and deplores the re cent sad and tragic death of John M. Wehrle, we know that the act was an unfortunate event, purely accidental and unintentional on the part of Mr. We prefer to write our own Knight. No intention nor motive could ever have any foundation in fact for nothing but neighborly kindness and perfect friendship ever existed between them. And this feeling was expressed and emphasized by deceased be fore his death in the kindest and tenderest manner, exonerating Mr. Knight from all censure or blame. CURES THE TOBACCO HABIT IN 4 TO 10 DAYS OR MONEY REFUNDED.

Use All the Tobacco You Want Till Your "Graving" is Gone.

NARCOTI-CURE is the only remedy in the world that acts directly on the nerves and drives the nicotine from the system in from four to ten days. It leaves the patient in better health than before taking, and is warranted free from any injurious ingredients.

NARCOTI-CURE is popular because it allows the patient to use all the tobacco he wants while under treatment, or until the "craving" and "hankering" are gone. It is then no sacrifice to throw away tobacco forever. NARCOTI-CURE is sold at the uniform price of \$5.00 a bottle and one bottle

bacco for 46 years, and of late have conto use tobacco when I was only 11 years old and have never been able to give up the habit until I took Narcoti-Cure, although I have tried other so-called remedies without effect. After using your remedy four days, all "hankering" or chewing disappeared, and in four ays more smoking became unpleasant. I have no further desire for the weed, and experienced no bad effects, whatever.

I am gaining in flesh and feel better than I have for a long time. To all who wish to be free from the tobacco habit I would say, use NARCOTI-CURE.

STENCIL DESIGNS.

AMATEURS MAY USE THEM FOR A FRIEZE DECORATION.

A Few Color Suggestions—How to Paint Gold Size-Preparing the Stencils-Adding Some Handwork.

The amateur may do some very creditable work with stencil designs if neat and careful. For a frieze decoration these designs will be found especially useful. With a view to assisting begin-

Place the paper or cloth on glass and cut out the design with a sharp knife. If not desirable to leave in the stencil breaks on the wall, unite them by painting them with a suitable brush. Stencil work looks best when some hand work is added, and where considerable of this is done the effect is very similar to entire hand work.

HOW TO TELL POOR MILK.

A Plan Whereby Any Adulteration May Be Easily Detected.

A small dish should be carefully weighed, a small amount of milk added and then weighed again. By subtracting the weight of the dish from the weight In the Pattern-Directions For Making a of both, the weight of the milk is found and carefully recorded. The dish is placed over a steam jet, and the water of the milk evaporates, leaving a residue. It is this residue which passes under the name of "solids." A last weighing of the dish with the milk residue, less the weight of the dish, gives the solids, and by a single calculation the percentage is found.

The solids of milk have been found by innumerable analyses to average about 13 per cent, and while the fat varies in the milk from different cows, the solid left after extracting the fat is a very constant quantity, hardly ever falling below 9 per cent. This gives the chemist a positive basis for his calculations and enables him to state with great certainty whether or not the milk has been watered. The fat or oil in milk is determined by dissolving it by means of ether out of the total solids, the residue remaining after the operation being termed "solids, not fat." The average fat or oil found in cow's milk is 3 per cent, and any amount less than this is commonly taken as showing that the milk has been skimmed. If analysis shows a decrease of fat-and solids, not fat-it is said to be certain that the milk has been watered, while if the fat only is low it shows that the milk has been

How to Preserve Seaweed.

The seaweed must first be cleaned in fresh water and then placed in a platter also containing fresh water. Take a piece of stiff drawing paper and slip it under the seaweed, which may then be arranged in its most attractive form. Allow the water to run off and put the sheet with the seaweed upon some leaves of blotting paper, and over this, directly in contact with the specimen, place a bit of muslin or a sheet of waxed paper and then some more blotting paper and a heavy weight.

After 24 hours the blotting paper and muslin may be removed. Then do as before, using dry blotting paper and muslin, and continue until the seaweed is perfectly dry, when it will look like a bit of delicate painting.

How to Scrape Kettles.

A thick lipped oyster shell is a kitchen convenience of a high order. It is a better pot and kettle scrapper than the iron disheloths. The chain arrangements called by that name are abominations which succeed in collecting all the scraps of burned potato, fried onion, cabbage and the like, and which can be kept clean only by frequent baths in concentrated lye. An oyster shell, on the other hand, can be kept perfectly clean.

How to Hang Pictures.

The one thing which is unforgivable in hanging pictures is to "string" them along the walls in a line. Next to that crime is the one of arranging exactly symmetrical groups, suggestive of nothing so much as a lesson in geometry. Group pictures, group them gracefully. but don't, when one has succeeded in making a graceful bunch on one side of the fireplace, reproduce it exactly on the
